

main.jsx

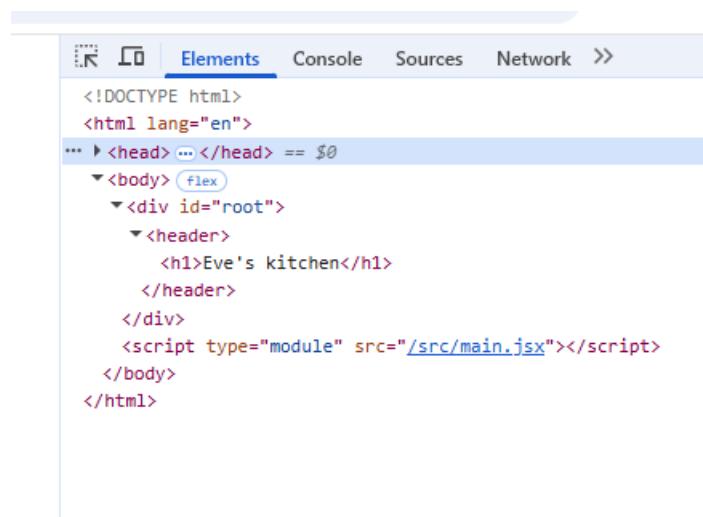

find element 'root' and render 'App' component. Click Inspect to check that

The screenshot shows the browser's developer tools with the 'Elements' tab selected. The DOM tree is displayed, starting with the root element: <html lang="en">. It contains a head and a body. The body has a div with id="root". Inside this div, there is an h1 element with the text "Hello React!". Below the div, there is a script tag with type="module" and src="/src/main.jsx". The entire code is as follows:

```
...<!DOCTYPE html> == $0
<html lang="en">
  <head> ...</head>
  <body> (flex)
    <div id="root">
      <h1>Hello React!</h1>
    </div>
    <script type="module" src="/src/main.jsx"></script>
  </body>
</html>
```

Hello Javascript!

The screenshot shows the browser's developer tools with the 'Elements' tab selected. The DOM tree is displayed, starting with the root element: <html lang="en">. It contains a head and a body. The body has a div with id="root". Inside this div, there is a header component. The header contains an h1 element with the text "Eve's kitchen". Below the header, there is a script tag with type="module" and src="/src/main.jsx". The entire code is as follows:

```
<!DOCTYPE html>
<html lang="en">
... > <head> ...</head> == $0
  <body> (flex)
    <div id="root">
      <header>
        <h1>Eve's kitchen</h1>
      </header>
    </div>
    <script type="module" src="/src/main.jsx"></script>
  </body>
</html>
```

```
